

IV Infusions Available at the Headache & Wellness Center

An IV infusion involves placing an IV in your vein to deliver a mixture of ingredients, such as vitamins and minerals, from a prepared bag of fluids. This infusion lasts approximately one hour. A brief history is taken prior to the infusion to ensure your safety. Sometimes lab work is needed prior to, or after, an infusion. Typically, the infusion is a relatively painless process and patients leave feeling better.

P.M.S. Away: starts at \$130

Premenstrual Syndrome is a group of symptoms that occur in women, typically between ovulation and a period. P.M.S Away is designed to minimize bloating, irritability, lessen abdominal discomfort and lower back pain related to menstrual cycle symptoms.
